

Federal Energy Management Program

November 2011 Alternative Fuel Finder Table

NREL maintains a database of alternative fueling stations nationwide through the Alternative Fuels and Advanced Vehicles Data Center (AFDC). The table below shows four compressed natural gas (CNG) stations, 10 E85 stations, two hydrogen (HY) stations, and 128 electric vehicle supply equipment (EVSE) stations added in 19 states since the October 2011 edition of Federal Fleet Files. Unless otherwise noted, only open, publicly accessible stations are included. Electric vehicle supply equipment stations are included to prepare agencies for incorporating electric vehicles into fleets. Check the AFDC [Alternative Fueling Station Locator](#) for up-to-date information.
