

Federal Energy Management Program

October 2011 Alternative Fuel Finder Table

NREL maintains a database of alternative fueling stations nationwide through the AFDC. The table below shows three compressed natural gas (CNG), eight E85 stations, one liquefied natural gas (LNG) station, one liquefied petroleum gas (LPG) station, and 70 electric vehicle supply equipment (EVSE) stations added in 22 states since the September 2011 edition of Federal Fleet Files. Unless otherwise noted, only open, publicly accessible stations are included. Electric vehicle supply equipment stations are included to prepare agencies for incorporating electric vehicles into fleets. Check the AFDC [Alternative Fueling Station Locator](#) for up-to-date information.
