

## Federal Fleet Files

Vol. 2, No. 11 – October 2010

Highlighting the latest news and developments affecting Federal fleets.

### EPAct Section 701 Waivers

Section 701 of the Energy Policy Act (EPAct) of 2005 requires Federal agencies to use only alternative fuel in all dual-fueled vehicles, except where vehicles have received a waiver from the U.S. Department of Energy (DOE). Agencies may qualify for a waiver if the needed alternative fuel is not reasonably available (i.e., within a 5-mile or 15-minute drive) or is more expensive per gallon than gasoline.

The Section 701 waiver request data call began June 1, 2010, and FEMP has just completed the initial review of the submitted data. The table below highlights the number of requested and approved waivers in 2010 and 2011, along with the change between these two years.

#### EPAct Section 701 Waiver Data

	2010	2011	Change
<b>Requested</b>	92,083	80,962	-12%
<b>Approved</b>	74,133	70,990	-4%

#### Federal Fleet Files Contact

The FEMP Federal fleet team continually strives to increase outreach to Federal fleet managers. This publication provides updates on regulatory issues and reporting deadlines, highlights success stories and best practices, promotes upcoming events, and informs fleets on the expanding availability of alternative fueling stations. For comments or to subscribe to Federal Fleet Files, contact Ryan Daley at [ryan.daley@nrel.gov](mailto:ryan.daley@nrel.gov).

Agencies should review the results, and may appeal any decision through a formal written request to FEMP. Requests should be e-mailed to Amanda Sahl at DOE at [amanda.sahl@ee.doe.gov](mailto:amanda.sahl@ee.doe.gov), with a CC to Ryan Daley at the National Renewable Energy Laboratory (NREL) at [ryan.daley@nrel.gov](mailto:ryan.daley@nrel.gov). Documentation of the reason and/or justification for an appeal is required before the request can be considered.

FEMP is currently working to improve how Section 701 waiver data is made available to the public to better identify alternative fuel market opportunities for retailers near Federal fleets. This effort includes loading the data into NREL's TransAtlas tool, which will improve the usability of the data. In addition, more information will be made available regarding waived vehicle locations. TransAtlas can be found at <http://maps.nrel.gov/transatlas>.

### Save the Date: 2010 Regional EPAct Workshops

The DOE State and Alternative Fuel Provider Fleets Program is sponsoring a series of Regional EPAct Workshops in 2010. The workshops provide technical, regulatory, and networking support to assist EPAct-regulated fleets and alternative fuel stakeholders in overcoming alternative fuel deployment barriers.

The final 2010 Regional EPAct Workshop will be held Thursday, October 14 in Boston, Massachusetts. Federal agencies should provide point-of-contact information in the Boston area to Ryan Daley at [ryan.daley@nrel.gov](mailto:ryan.daley@nrel.gov). Workshop information and updates are available at [www.eere.energy.gov/vehiclesandfuels/epact/workshops.html](http://www.eere.energy.gov/vehiclesandfuels/epact/workshops.html).

### Call for Projects—Clean Cities National Parks Initiative

A call for projects will be announced soon for alternative fuel and advanced technology vehicle projects within the U.S. National Park Service (NPS). Through a partnership between DOE and NPS, funding will be available for projects at national parks, national historic sites, national memorials, and national seashores. Applications and project guidelines will be available in late October 2010 at [www.eere.energy.gov/cleancities/partnerships.html](http://www.eere.energy.gov/cleancities/partnerships.html), and any questions should be directed to Andrew Hudgins at NREL at [andrew.hudgins@nrel.gov](mailto:andrew.hudgins@nrel.gov).

### Fleet Technical Assistance Programs

Last month, we mentioned that a call for fleet technical assistance projects would be announced soon. The objective of this program is to provide technical assistance to Federal fleets to help them meet or exceed Federal fleet requirements while meeting mission needs. This call for projects is currently on hold, but stay tuned for updates on this opportunity.

## Alternative Fuel Finder

NREL maintains a database of alternative fueling stations nationwide through the DOE Alternative Fuels and Advanced Vehicles Data Center (AFDC). The list below shows new alternative fueling stations added to the database since last publication. Unless otherwise noted, only open, publicly accessible stations are included. Stations accept Wright Express and Voyager fleet payment cards unless otherwise noted. Check the AFDC Alternative Fueling Station Locator for up-to-date information: [www.afdc.energy.gov/afdc/locator/stations/](http://www.afdc.energy.gov/afdc/locator/stations/).

Type	Station Name	Street Address	City	ST	Waivers*	Agencies Affected†
